

Syllabus of 7th Grade Math

Instructor: Zhenlin Ju
Email: Zhenlin_ju@yahoo.com

Welcome to the 7th grade math! This math course mainly covers Algebra I: exponential and logarithmic functions, polynomials, factoring, equations, linear relations and functions, systems of inequalities, quadratic functions, probability and statistics, etc. There is an emphasis on critical thinking skills, real applications, technology and problem solving strategies.

Basic requirements are to come to class, taking notes and having all the necessary materials and assignments with an attitude of willingness to learn and participate. You could own a scientific calculator. If you are absent for any reason, it is your responsibility to get and complete missed assignments. You will do well in this class if you work hard, ask questions, stay away from late work, take extra credit opportunities, and study adequately for tests.

Homework and Quiz: Homework assignment will be given at end of class and collected at beginning of next class. A 5 ~ 10-minute quiz will be given in each class.

Middle Term and Final Exams:

Middle Term: 100 points
Final Exam: 100 points

Final Score:	Homework	25%
	Quiz	10%
	Middle Term	20%
	Final Exam	40%
	Participation	5%

Grading: 90-100%: A, 80-89%: B, 65-79%: C, 60-64%: D, 59% and below: F.
